

Claim Amendments:

Claim 1. (Currently amended): A delayed release coated core which produces a timed pulse release containing an active substance in its core and a polymer coating comprising ~~one or more~~ an ammonio methacrylate copolymers copolymer, said core further containing ~~one or more~~ surfactants, one of said surfactants being capable of diffusing into the polymer coating and provoking a sudden change in the coating's properties a cationic or zwitterionic surfactant in an amount of from 10% to 50% relative to the amount of ammonio methacrylate copolymer in the coating.

Claim 2 (Cancelled)

Claim 3. (Currently amended): A delayed release coated core according to ~~claim 2~~ claim 1 wherein the ammonio methacrylate copolymers are of type A or B.

Claim 4. (Currently amended): A delayed release coated core according to Claim 3 wherein the ~~cationic surfactants are~~ surfactant is chosen from trimethyl-dimyristoyl-ammonium propionate, dimethyl-dioctadecyl-ammonium bromide, trimethyl-cetyl-ammonium bromide, dimethyl-didodecyl--ammonium bromide, benzalkonium chloride, cetylpyridinium chloride and cetrimide and the ~~zwitterionic surfactants are~~ surfactant is chosen from N-allylbetaines, C-alkylbetaines, N-alkylamidobetaines, N-alkylglycines, phosphatidylcholines and lecithins.

Claim 5 (Cancelled)

Claim 6. (Previously amended): A delayed release coated core according to claim 4 wherein the zwitterionic surfactant is cocamidopropylbetaine.

Claim 7. (Previously amended): A delayed release coated core according to Claim 3 wherein the active substance is chosen from diltazem, theophylline, felodipine, verapamil, clonidine, acebutolol, alprenolol, betaxolol, metoprolol, nadolol, propranolol, timolol, captopril, enalapril, fosinopril, tiapamil, gallopamil, amlodipine, nitrendipine, nisoldipine, nicardipine, felodipine, molsidamine, indomethacin, sulindac, indoprofen, ketoprofen, flurbiprofen, fenbufen, fluprofen, diclofenac, tiaprofenic acid, naproxen, mizolastin, terbutaline, salbutamol, betamethasone, prednisone, methylprednisone, dexamethasone, prednisolone, sumatriptan, naratriptan,

cimetidine, ranitidine, famotidine, nizatidine, omeprazole, morphine, fenoprofen, ibuprofen, ketoprofen, alclofenac, mefenamic, alfuzosin, prazosin, tamulosin, levodopa and methyldopa, their salts and pharmacologically active esters.

Claim 8. (Previously amended): A delayed release coated core according to Claim 3 in the form of a particle, pellet, bead, granule or spheroid, of a diameter comprised between 0.3 and 3 mm.

Claim 9. (Previously amended): A delayed release coated core according to Claim 3 in the form of a tablet or a minitabket.

Claim 10 (Cancelled)

Claim 11. (Previously amended): A delayed release coated core according to Claim 3 wherein the core is separated from the polymer coating by a layer of water soluble polymer.

Claim 12. (Previously amended): A delayed release coated core according to claim 11 wherein the soluble polymer is chosen from hydroxypropylmethylcellulose, hydroxyethylcellulose and polyvinylpyrrolidone.

Claim 13. (Previously amended): A pharmaceutical dosage form comprising a delayed release coated core according to Claim 3.

Claim 14. (Previously amended): A pharmaceutical dosage form according to claim 13 in the form of a tablet, a multilayer tablet, a multicoated tablet or a capsule.

Claim 15. (Currently amended): A pharmaceutical dosage form according to claim 13 wherein coated cores of differing delayed release times are combined together to give a “stepped” stepped release profile.

Claim 16. (Previously amended): A pharmaceutical dosage form according to claim 13 wherein the delayed release coated core is combined with another galenic entity, the release of said entity being immediate or sustained.

Claim 17. (Previously amended): A pharmaceutical dosage form according to claim 16 wherein the other galenic entity contains an active substance different from the active substance in the delayed release coated core.

Claim 18. (Previously amended): A pharmaceutical dosage form according to claim 16 wherein a first release pulse occurs immediately and a second release pulse is delayed for a fixed time.

Claim 19. (Previously amended): A capsule according to claim 16 comprising a delayed release coated core in the form of a particle, pellet, bead granule or spheroid having a diameter of 0.3 to 3 mm or in the form of a minitab, and an immediate and/or sustained release entity chosen from

(i) immediate release particles or minitab, and an immediate release granule or powder, and

(ii) controlled release particles or minitab.

Claim 20. (Previously amended): A tablet according to claim 16 wherein the delayed release coated core in the form of a particle, pellet, bead granule or spheroid having a diameter of 0.3 to 3 mm is imbedded in a rapidly disintegrating matrix.

Claim 21. (Previously amended): A capsule according to claim 16 comprising one or more immediate release tablets and one or more delayed release coated cores in the form of tablets.

Claim 22. (Previously amended): A multicoated tablet according to claim 16 coated with an immediate release soluble or disintegrable coating.

Claim 23. (Previously added): A tablet according to claim 20 wherein the matrix is free of active substance.

Claim 24. (Previously added): A tablet according to claim 20 wherein the matrix also contains active substance.

Claim 25. (Previously added): A tablet according to claim 20 wherein sustained release particles are mixed with the delayed release coated particles.

Claim 26. (Previously added): A tablet according to claim 20 wherein immediate release particles are mixed with the delayed release coated particles.

Claim 27. (Previously added): A tablet according to claim 20 wherein the delayed release coated particles are further coated with a layer containing the active substance.

Claim 28. (Previously added): A tablet according to claim 20 comprising one or more layers containing the delayed release particles in the rapidly disintegrating matrix and one or more layers containing the active substance in an immediate release matrix.

Claim 29. (Previously added): A delayed release coated core according to Claim 3, said core further containing a pharmaceutically acceptable organic acid.

Claim 30. (Previously added): A delayed release coated core according to claim 4, said core further containing an acid chosen from maleic, tartaric, malic, fumaric, lactic, citric, adipic and succinic acid or a salt thereof.

Claim 31. (Previously added): A delayed release coated core according to claim 30 wherein the acid is chosen from tartaric, fumaric, citric and succinic acid or salt thereof.

Claim 32. (Previously added): A delayed release coated core according to claim 31 wherein the acid is succinic or tartaric acid and the surfactant is cetylpyridinium chloride or cocamidopropylbetaine.

Claim 33. (Previously added): A delayed release coated core according to claim 32 wherein the active substance is alfuzosin or an acid-addition salt thereof.

Claim 34. (Previously added): A delayed release coated core according to claim 32 wherein the active substance is a hypnotic.
